The Education Workforce Council (EWC) is the independent, professional regulator for the education workforce in Wales. All data included in this summary is derived from the EWC Register of Education Practitioners and relates specifically to school teachers employed in a leadership role.

In this insight, we will breakdown various characteristics of school teachers employed in a leadership role.

### **Introduction to the Education Workforce Council's leadership Data Insight for 2025**

These statistics have been produced using data from the Register of Education Practitioners. The information that we are able to hold on the Register is set out in the Education Workforce Council (Main Functions) (Wales) Regulations 2015, as amended.

The Register is real time and provides a unique source of data about the 13 registered education groups in Wales. No equivalent data is available from any other body or organisation. Consequently, comparison should not be made with other sources such as the Welsh Government School Workforce Annual Census (SWAC), also published annually. For the school sector in particular, unlike SWAC, our data includes all supply staff, peripatetic workers, freelance workers, and others who provide education or training in a school, as well as other education settings. We also hold significant historic data which enables us to provide trend information.

The statistics in this report are based on the following criteria:

- registrant numbers are recorded as actuals, rather than full-time equivalent
- the census date used for the data taken from the Register is 1 March each year
- where a registrant has more than one employment record on the Register (e.g. school teacher in a school and a further education teacher in a college) the relevant employment information is recorded in each category they are registered in
- the information recorded on the Register is obtained directly from the practitioner and/or their employer
- percentages may not total 100 due to rounding
